

Bonneville Power Administration/Town of Steilacoom Smart Thermostat Rebate Program

Requirement and Specifications

Measures include smart thermostats for homes with electric forced-air furnace, air source heat pumps and ground-source heat pumps as their primary system. These measures are available for existing and new construction single-family, multifamily low-rise and multifamily mid-/high-rise homes. Smart thermostats may be installed by homeowners or directly installed by utilities, utility representatives or HVAC contractors.

Qualifying smart thermostats must:

- Be listed on [BPA's Smart Thermostat Qualified Products List](#); and
- Be set to the geographic location where the thermostat is located.

In addition to the requirements above, thermostats controlling air source heat pumps must be programmed to recognize the existing heat pump system.

Thermostats that control cooling-only systems or dual fuel heating systems (gas furnace and electric heat pump) are not eligible for an incentive.

Rebate Amounts:

One smart thermostat per qualifying heating system with a limit of two per household.

End-user installed: \$100/thermostat

Direct install HVAC Contractor: \$125/thermostat

To claim rebate; purchase and install qualifying thermostat(s). Complete Smart Thermostat Project Information form and along with a copy of your receipt, submit same to:
